94% Now Considering a Career in Tech

70% Students Underrepresented in CS

golT is a Digital Innovation & Career readiness program that introduces students to STEM, Computer Science, Design Thinking and Innovation.

As Tata Consultancy Services (TCS) signature student engagement program, golT helps students design human-centered solutions that harness technologies for innovation and social good. Through a standards-aligned engaging curriculum, students are introduced to the innovation lifecycle, product prototyping, and industry relevant entrepreneurial skills. The program is free of cost for all participants.

Spark Curiosity

Demystify CS

Meet Industry Experts

Provide a Safe Space to Innovate

Build Skills and Confidence

Digital Innovation Education

Modularized content allows for flexibility, scalability, and open access to all learners:

Curriculum Aligned

Incorporates 21st Century IT skills

12-24 Hours of Programming

TCS and Client Mentors

Years 5 - 10

Optional unplugged delivery mode

Solutions tied directly to the United Nations Sustainable Development Goals

What the Tata program allowed us to do was hone in on citizenship, collaboration, and creativity to really get our students thinking about information technology skills within the program. Students produced some of their best work they had throughout the year...it really raised the stakes for our students.

Daniel Zavone
Director of STEM
St Colomba Anglican School

goIT Key Offerings
